AV Rider.

Presentation and show computer.

Drue presents from the venue's show computer. Her PowerPoint deck, with embedded videos, arrives on a USB drive.

Screen

16:9 projection or LED at 1920 × 1080 or higher.

Slide advancer

DSAN PerfectCue or equivalent, connected to the show computer.

Audio

Show-computer audio routed through the house system for video clips.

Microphone

Wireless headset preferred; lavalier is fine.

Monitor

One at the front of the stage, showing the current slide, plus a visible countdown timer.

No lectern

If one is fixed, Drue presents in front of it.

Lighting

An even stage wash that lights Drue without spilling onto the screen.

Tech check

30 minutes with the AV lead, preferably the day before, to step through the deck.

Water

A bottle of water on stage.
